Verbal Reasoning

Instructions

TO SCORE THIS TEST - Click to the last question of the exam, which is the submit page. Students using PDF printouts must also score the test online; there is no paper answer key. Each question in Synonyms consists of a word in capital letters followed by four answer choices. Select the one word that is most nearly the same in meaning as the word in capital letters. Each question in Sentence Completion is made up of a sentence with one blank. Each blank indicates that a word or phrase is missing. The sentence is followed by four answer choices. Select the word or phrase that will best complete the meaning of the sentence as a whole.

1.

ANTICIPATE

A	justify
B	participate
C	predict
D	regret

2.

SALVAGE

A	deliver
B	imperil
C	recover
D	venture

3.

OBLIGATION

A	achievement
B	duty
C	exemption
D	goal

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

4.

CAPTIVATING

A	attractive
B	boring
C	harsh
D	ominous

5.

SOCIABLE

A	aloof
B	amiable
C	credible
D	distant

6.

NESTLE

A	nurture
B	observe
C	remove
D	huddle

7.

MOIST

A	arid
B	barren
C	damp
D	scorching

8.

MINIATURE

A	colossal
B	microscopic
C	punishing
D	visible

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

9.

MYTH

A	legend
B	past
C	recommendation
D	truth

10.

PRELIMINARY

A	damaging
B	endless
C	introductory
D	trivial

11.

POSSESS

A	deny
B	intrude
C	nauseate
D	own

12.

CONSPICUOUS

A	obscure
B	prominent
C	splendid
D	whimsical

13.

ABNORMAL

A	conventional
B	peculiar
C	skillful
D	trustworthy

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

14.

MIGRATION

A	marvel
B	movement
C	secession
D	utopia

15.

FRIGID

A	amusing
B	exciting
C	freezing
D	sweltering

16.

SHIELD

A	protect
B	reveal
C	stifle
D	trace

17.

PARTICULAR

A	bland
B	distinct
C	formulaic
D	patriotic

18.

Tales of vampires are widespread in today's society, but such stories are believed to have ---------- from eastern Europe as early as the 17th century.

A	adjusted
B	complimented
C	emerged
D	persecuted

19.

Mikayla is the ultimate ---------- ; even when her pen leaked all over her new jeans, she praised the outcome as an improvement rather than a mess.

A	ancestor
B	optimist
C	orator
D	recluse

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

20.

Jonathan was extremely ---------- when he discovered that he had read the wrong chapters in the book prior to his latest science exam.

A	amiable
B	exhilarated
C	jubilant
D	distressed

21.

Although the latest Youtube challenge was relatively ----------, schools banned it anyways because it was causing such a disturbance in the classroom.

A	aggressive
B	destructive
C	harmful
D	innocuous

22.

The delicious ---------- of the food truck wafted into the building and lured all of the hungry office workers outside immediately.

A	aroma
B	nausea
C	onset
D	parasite

23.

While the outside of the house looked ----------, the inside was littered with trash and debris from the floor all the way up to the ceiling.

A	artificial
B	diverse
C	immaculate
D	ominous

24.

The ghost hunters may have boasted about their courage and confidence, but the nervous looks on their faces as they entered the haunted house revealed that they were quite ----------.

A	arrogant
B	gregarious
C	hollow
D	intimidated

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

25.

Before accepting her lifetime achievement award, the musician performed a ---------- of all her hit songs from the 80s, 90s, and 2000s in front of the adoring audience.

A	liberation
B	medium
C	medley
D	ornament

26.

Alice's Adventures in Wonderland is often regarded as a ---------- novel due to its variety of fanciful details, including a talking cat, magical foods, and a mischievous army of playing cards.

A	banal
B	prolonged
C	trite
D	whimsical

27.

Compared to his twin brother who loved skydiving and bungee-jumping, Craig was recognized more for his ---------- due to his tendency to stay indoors and play board games.

A	audacity
B	extravagance
C	obedience
D	prudence

28.

After being hit by another spit-ball, the substitute teacher had no choice but to call the principal into the classroom to address the students' ---------- behavior.

A	charitable
B	melancholy
C	tranquil
D	unruly

29.

Michael Jordan's incredible basketball prowess did not arise out of laziness during childhood; instead, he spent ----------.

A	afternoons daydreaming about video games
B	all of his earned money on new sneakers
C	countless hours practicing his jump-shot in the gym
D	time after school cleaning the chalkboards

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

30.

Although Veronica vowed to maintain her New Year's resolution of abstaining from junk food, she still ----------.

A ate chocolate ice cream and French fries every weekend
B purchased a new elliptical bike
C spent much time shopping in the health foods aisle
D went jogging with friends in the park

31.

Phoebe was such an aficionado of horror movies and all things scary that for her wedding, she ----------.

A choreographed a dance with the groom
B decided on a three-layer fudge cake for the reception
C held the ceremony in a cemetery at midnight
D wore her grandmother's old wedding gown

32.

If Jeremy wants to purchase tickets to the highly anticipated new *Star Wars* sequel, he likely has to ----------.

A ask his forgetful brother to buy them for him.
B camp out a day early at his local theater's box office
C sleep in late on the day of the premiere
D spend all his available money at the arcade

33.

The phrase “All cats have nine lives” rings true for one particular feline name Maximus, who ----------.

A befriended a dog when he was a kitten
B enjoyed meowing along to classical music
C fell from a ten-story building and survived
D was fed only the finest of tuna everyday

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

34.

The musical artist at the baseball game was horrified when she suddenly forgot the words to “The Star-Spangled Banner”, but was soon comforted by the sight of ----------.

A the entire stadium crowd helping her by singing along

B the local news crew giggling at her

C the players warming up in the dug-out

D the ushers firing their t-shirt cannons

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

Quantitative Reasoning

Instructions

Each question is followed by four suggested answers. Read each question and then decide which one of the four suggested answers is best.

35.

At a local pet shelter, there were 30 dogs and 45 cats available for adoption. What fraction of the animals are dogs?

A	$^{2}/_{5}$
B	$^{3}/_{4}$
C	$^{1}/_{2}$
D	$^{8}/_{9}$

36.

Which story best fits the equation: 15 ÷ 3 = 5

A	Paulie has 15 cookies, but 3 are chocolate chip. What fraction are chocolate chip?
B	Paulie made 15 cookies and 3 brownies. How many snacks did he make altogether?
C	Paulie made 15 cookies and ate 3. How many cookies are left?
D	Paulie wants to give 15 cookies to his 3 roommates. How many does each get?

37.

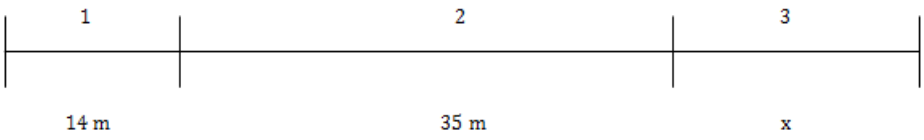

Jamie is thinking of two composite numbers that when added together become a prime number. Which of the following pairs could it be?

A	2 + 10
B	3 + 5
C	4 + 7
D	4 + 9

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

38.

A race is split into 3 different parts. The 1st part is 14 meters and the 2nd part is 35 meters. If the entire race is 70 meters, what is the length of the 3rd part?

A	17 meters
B	19 meters
C	21 meters
D	23 meters

39.

Use the following equations to answer the question:

$15 + x = 19$

$21 - 7 = y$

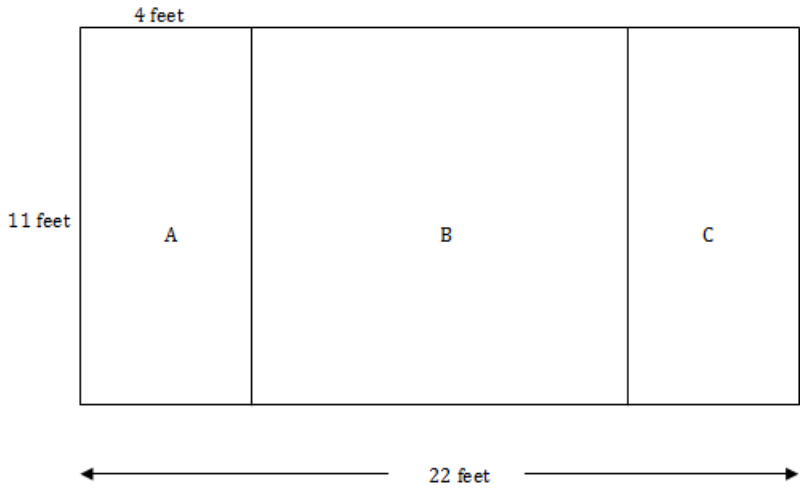

What is the sum of x and y?

A	16
B	18
C	20
D	22

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

40.

A pig pen has 3 separate enclosures: A, B, and C. If A and C are the same size, what is the area of enclosure B?

A	154 square feet
B	160 square feet
C	220 square feet
D	44 square feet

41.

Hilda and Harry entered a hot dog eating contest. Hilda ate 20 hot dogs in 5 minutes. If Harry ate at the same rate as Hilda, how many hotdogs could he eat in 8 minutes?

A	24 hot dogs
B	28 hot dogs
C	32 hot dogs
D	36 hot dogs

42.

Which of the following fraction statements is true?

A	$\frac{1}{2} > \frac{3}{4}$
B	$\frac{3}{4} = .60$
C	$\frac{2}{3} = \frac{8}{12}$
D	$\frac{4}{5} = .75$

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

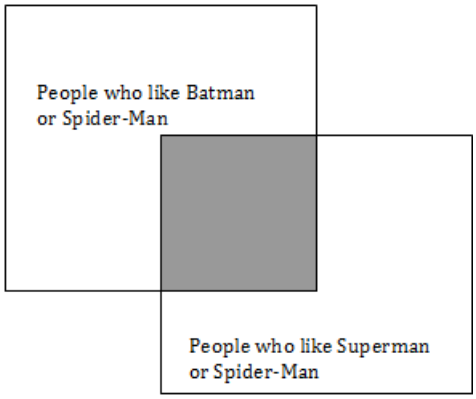

43.

A number z is divisible by 3 and 6. Which of the following statements about z must be true?

A	z is a prime number
B	z is an even number
C	z is an odd number
D	z is between 3 and 6

44.

Use the Venn diagram to answer the question.

What does the shaded portion represent?

A	People who like Batman and Superman
B	People who like Spider-Man
C	People who like Wonder Woman
D	People who like comic books

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

45.

The following table shows the type of foods available at the rodeo as well as the number sold each day. Which food experienced the greatest increase in number sold from Day 2 to Day 3?

Food	Day 1	Day 2	Day 3
Turkey legs	250	275	300
Fried Oreos	165	180	210
Chili Dogs	195	185	200
Nachos	65	90	75

A	Chili Dogs
B	Fried Oreos
C	Nachos
D	Turkey legs

46.

Fill in the blank for the following number sequence:

2, 8, 32, ----------, 512

A	128
B	140
C	40
D	42

47.

If the perimeter of a baseball diamond is 60k, and all 4 of its sides are the same, what is the length of one side?

A	15
B	15k
C	30
D	30k

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

48.

Which of the following is the value for P in the equation?

12P + 4 = 40

A	3
B	4
C	5
D	6

49.

NASA scientists brought back an organism from Mars, which replicated each time it was exposed to an open flame. Below is a table of these results:

# of organisms (x)	# of organisms after exposure to flame (y)
6	20
8	26
10	32
12	z

Which of the following rules can be used to find z?

A	z = 3x + 2
B	z = 3x - 2
C	z = 4x + 4
D	z = 4x - 4

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

50.

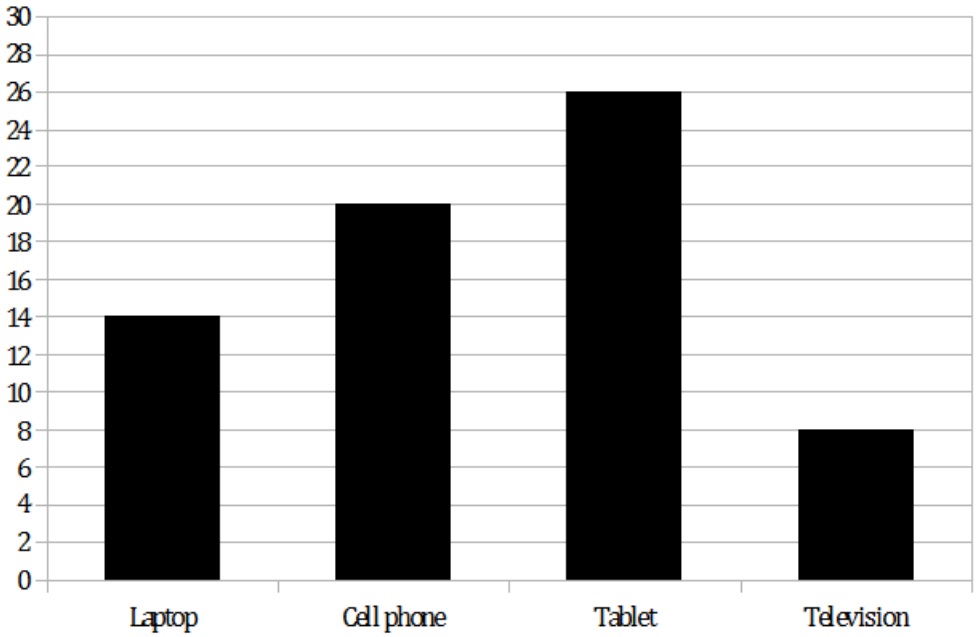

Joe owns a snow plow service and he can plow 22 driveways every hour. If Joe has already done 44 driveways at noon, how many driveways will he have cleared by 4:30?

A	99
B	121
C	132
D	143

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

51.

A teacher asked her students to choose their favorite technological devices.

A Laptops are the second most popular choice among students.

B The combined number of students who prefer laptops or cellphones is greater than tablets.

C The number of students who prefer laptops is less than the difference between cell phones and tablets.

D There is a greater difference between laptops and cell phones than tablets and TVs.

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

52.

Wesley is practicing for a marathon. So far, he has accumulated the following times: 2 hours and 15 minutes, 2 hours and 30 minutes, 1 hour and 55 minutes, and 2 hours and 5 minutes. Which of the following is the range of these times?

A 25 minutes

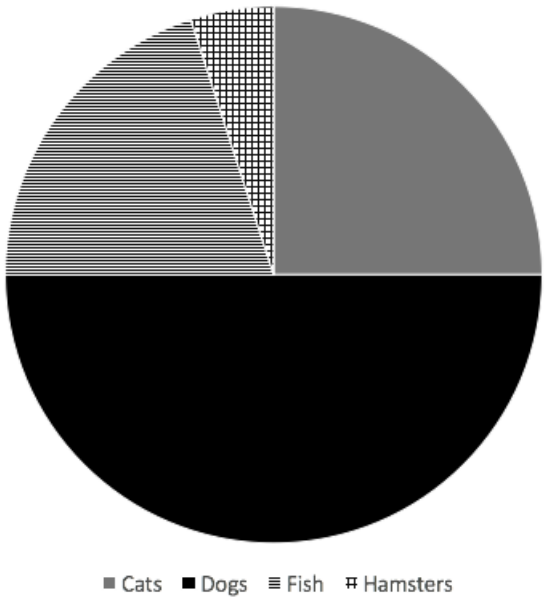

B 30 minutes

C 35 minutes

D 40 minutes

53.

The following chart displays people's preference for different pets.

A People prefer dogs the least.

B People prefer hamsters or fish more than cats.

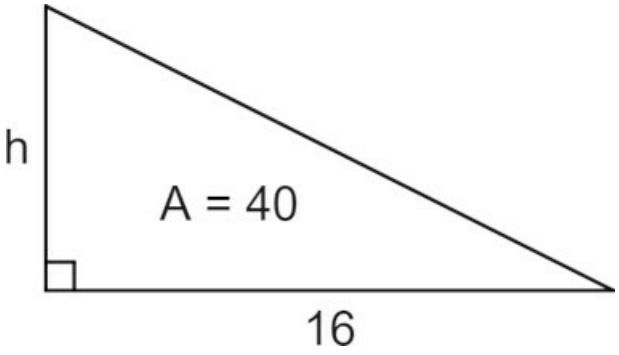

C The number of people who prefer fish or hamsters is equivalent to the number of people who prefer cats.

D The number of people who prefer fish or hamsters is equivalent to the number of people who prefer dogs.

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

54.

If the area of a triangle is 40 in^2 and it has a base of 16 in, what is the height of the triangle? ($A = \frac{1}{2}bh$, where A = Area, b = base, and h = height)

A	3 in
B	4 in
C	5 in
D	6 in

55.

The new football stadium can hold a total of 165,713 people. What is the written form of this number?

A	One hundred sixty-five thousand thirteen people
B	One hundred sixty-five thousand seven hundred thirteen people
C	One hundred sixty-five thousand seven-hundred three people
D	One million sixty-five thousand seven hundred thirteen people

56.

Jake wants to build a Lego replica of his own house, which happens to be in the shape of a square. If he uses the scale 5 inches = 20 feet, what is the area of Jake's Lego replica if one side of his house is 60 feet?

A	100 square inches
B	225 square feet
C	225 square inches
D	240 square feet

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

57.

Willy Wonka is once again offering tickets to his chocolate factory. The Chewy-Chewy bars have a ⅓ chance of having the golden ticket; the Super-Sour Suckers have a $^{5}/_{10}$ chance of having a golden ticket; the Gigantic Gobsmackers have a ⅕ chance of having the golden ticket; and the Yummy Gummies have a $^{6}/_{8}$ chance of having the golden ticket.

Which candy has the best chance of having the golden ticket?

A	Chewy-Chewy bar
B	Gigantic Gobsmackers
C	Super-Sour Suckers
D	Yummy Gummies

58.

Which of the following geometrical shapes can NEVER have a right angle?

A	circle
B	rectangle
C	square
D	triangle

59.

The new athletics store recently received a big shipment of sneakers. They received 78 running shoes, 96 basketball shoes, 55 soccer shoes, 36 wrestling shoes, and 120 training shoes.

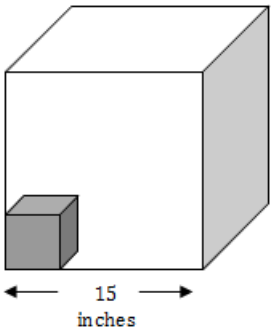

Which of the following is the median of the data?

A	36 shoes
B	55 shoes
C	78 shoes
D	84 shoes

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

60.

If the ratio of side lengths of the small cube to the large cube is 1:3, what is the volume of the smaller cube?

A	125 cubic inches
B	225 cubic inches
C	27 cubic inches
D	45 cubic inches

61.

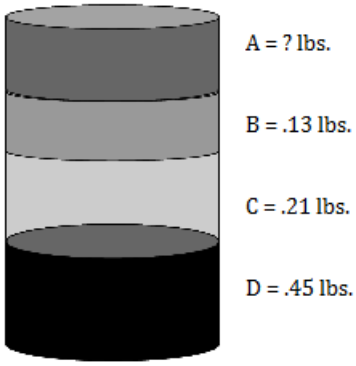

A 5th grade class had a graduation party. To celebrate, the teacher brought a piñata. It contained 27 red candies, 43 blue candies, 54 red & green striped candies, 17 blue & red striped candies, and 19 red, blue, and yellow striped candies. If a student hits the piñata, and one piece of candy falls out at random, what is the probability that it has two or more colors?

A	$^{13}/_{16}$
B	$^{11}/_{16}$
C	$^{7}/_{16}$
D	$^{9}/_{16}$

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

62.

A special, 1-pound cake has four different layers. The amount for three of the layers is shown below. How many pounds does it take to fill in the final layer?

A	.21 lbs.
B	.25 lbs.
C	.29 lbs.
D	.33 lbs.

63.

The length of *AC* is $32a$ and the length of *BC* is $12b$.

What is the length of *AB*?

A	$44ab$
B	$20ab$
C	$32a + 12b$
D	$32a - 12b$

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

64.

Which of the following equations is read as “the difference between 6q and 4r is less than the sum of 3s and 5t”?

A	6q + 4r < 3s - 5t
B	6q + 4r > 3s - 5t
C	6q – 4r < 3s + 5t
D	6q – 4r > 3s + 5t

65.

A person's weight on the moon is only about ⅙ of their actual weight. What is the best estimate for how much a person who weighs 175 lbs. on Earth would weigh on the moon?

A	30 lbs.
B	45 lbs.
C	55 lbs.
D	75 lbs.

66.

Luis bought a new bag of marbles. In each bag, there are 40 solid colored marbles, 35 mixed colored marbles, 12 gold-specked marbles, and 13 shiny silver marbles. If he were to pick a marble at random, what is the probability that it will be either gold or silver?

A	25%
B	33%
C	40%
D	50%

67.

Which of the following is a reasonable estimate for the product of 515 and 390?

A	between 19,000 and 21,000
B	between 14,000 and 16,000
C	between 140,000 and 160,000
D	between 190,000 and 210,000

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

68.

What is the value of q in the following equation if p is equal to 12?

$4p - 4 = 5q - 3p + 20$

A	10
B	11
C	12
D	13

69.

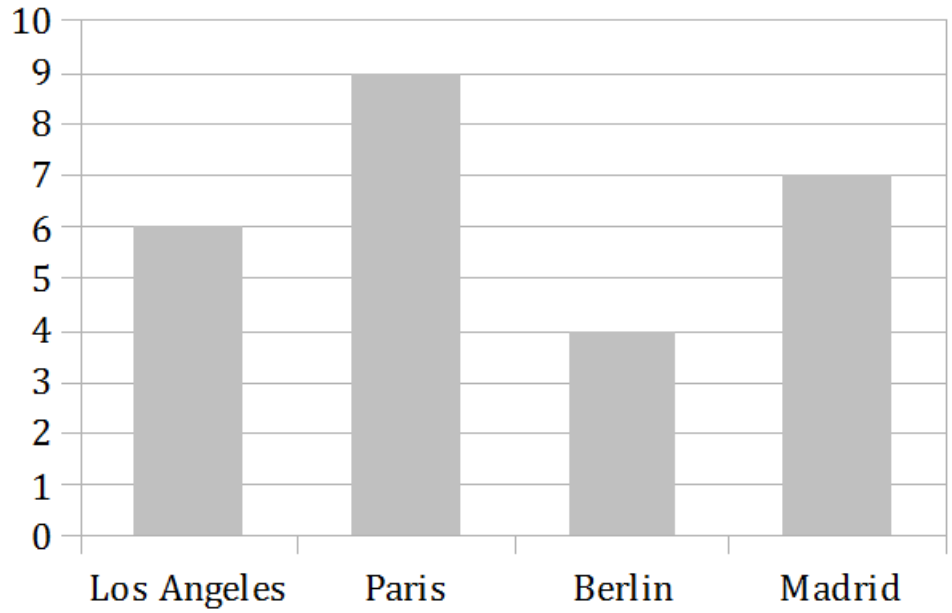

The mean of 4 different numbers is 32. Which of the following could be the set of numbers?

A	12, 24, 36, 48
B	30, 40, 50, 60
C	4, 8, 8, 12
D	8, 25, 35, 60

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

70.

The Olympic committee voted on which city would be the host of the next summer games. According to the data, which of the following statements is true?

A Paris beat out LA by a greater number of votes than Madrid over Berlin.

B The mean is equal to the range.

C The number of people who voted for Berlin and Paris was greater than the number of votes for LA and Madrid.

D The range is greater than the total of votes that Berlin received.

71.

What is the name of a quadrilateral with exactly one pair of parallel sides?

A Kite

B Rhombus

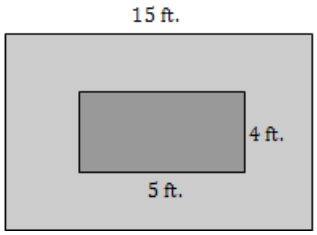

C Trapezoid

D Triangle

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

72.

A swimming pool is constructed in the middle of a backyard. If the scale of the pool to the yard 1:3, what is the area of the backyard, including the pool?

A 140 square feet

B 160 square feet

C 180 square feet

D 200 square feet

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

piqosity

Reading Comprehension

Instructions

This section contains short reading passages. Each passage is followed by five questions based on its content. Answer the questions following each passage on the basis of what is stated or implied in that passage.

Passage

Big cats can have anywhere from one to eight cubs or kittens in a litter, but most only have around two or three. Some smaller cats may have more, from four to seven. "Cub" is usually what you call young big cats, while "kitten" is reserved for young small cats. Cubs or kittens born in the same litter are called "siblings".

Because most big cats live in tropical locations, it doesn't matter what time of the year they have their young, because food will usually be plentiful. However, for cats that live in places that get cold in the winter, they will usually have their young in the spring.

The father almost never has any part in raising the young. Male lions take the job of protecting the pride instead of taking care of the young, but most fathers will leave completely. This may sound selfish, but it is not. In the animal world, often the responsibility for finding food and for the young rests upon the female. As carnivores, most would be too noisy hunting in pairs, so they would have less of a chance to catch their prey.

When the young are born, they are blind and keep their eyes closed. They will open their eyes in about 10 days to 14 days after birth. Most young also have different markings from their parents when they are born. Lion and puma cubs have spots or splotches that disappear as they get older. Clouded leopard cubs have dark spots that eventually change into the shape of the adult spots. Cheetahs are one kind of cat in which the cubs have the same spots as the adults.

It can be very treacherous for the young of many big cats. Many cheetah cubs are killed by a lack of food or their natural enemies (lions and hyenas). Lion cubs may be killed if a new male lion takes over a pride. The young are not able to eat meat right away; they usually must drink their mother's milk anywhere from one to two months for the smaller cats and up to seven months in bigger cats. When they reach an age of about two to three months, the mother can start taking the young out and teaching them how to hunt.

At a few months of age, cubs and kittens become very playful. They chase one another and pounce on anything that moves. This play teaches them basic hunting techniques, which helps them to become successful hunters as adults.

73.

The primary purpose of the passage is to

A describe the life of cats from birth through childhood

B explain differences between different types of cats

C provide details about cats' natural habitats

D show how adult cats live in the wild

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

74.

Based on the passage, which of the following would be a suitable location for most big cats?

A	African savanna
B	Arctic tundra
C	College dormitory
D	Inside one's house

75.

According to the passage, who is tasked with the responsibility of raising cubs or kittens?

A	Cubs or kittens can raise themselves
B	their father
C	their mother
D	their siblings

76.

In line 35, what is the meaning of the word “treacherous”?

A	banal
B	dangerous
C	difficult
D	melancholy

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

77.

According to the passage, which of the following is true?

A Cubs and kittens can be harmed by other cats.

B Cubs and kittens can consume meat immediately after birth.

C Cubs and kittens know how to hunt at one month of age.

D The play style of a cubs and kittens has nothing to do with their hunting ability.

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

Passage

Pearly mist shut out the river, the meadows, and every field for miles. I could not detect the ripple of the out going tide, and the heartiest songster sent no cheerful cry above the wide-spreading and low-lying cloud; but above all this silent, desolate, and seemingly deserted outlook there was a wealth of sunshine and a canopy of deep-blue sky. Here and there, as islands in a boundless sea, were the leafy tops of a few tall trees, and these, I fancied, were tempting regions to explore. Travels in a tree-top — surely, here we have a bit of novelty in this worn-out world.

Unless wholly wedded to the town, it is not cheering to think of the surrounding country as worn out. It is but little more than two centuries since the home-seeking folk of other lands came here to trick or trade with the Indians, wild as the untamed world wherein they dwelt; and now we look almost in vain for country as Nature fashioned it. Man may make of a desert a pleasant place, but he also unmakes the forest and bares the wooded hills until as naked and desolate as the fire-swept ruins of his own construction. It is but a matter of a few thousand cart-loads of the hill moved to one side, and the swamp that the farmer dreads because it yields no dollars is obliterated. He has never considered its wealth of suggestiveness.

But here and there the tall trees are still standing, and their tops are an untraveled country. I climbed an oak this cool midsummer morning; clambered beyond the mists, which were rolling away as I seated myself far above the ground, safe from intrusion, and resting trustfully on yielding branches that moved so gently in the passing breeze that I scarcely perceived their motion.

How much depends upon our point of view! The woodland path may not be charming if the undergrowth too closely shuts us in. In all we do, we seek a wider vision than our arm's length. There may be nothing better beyond than at our feet, but we never believe it. It is as natural to ask of the distant as of the future. They are closely akin. Here in the tree-top my wants were supplied. I was only in the least important sense cribbed, cabined, and confined.

Wild life, as we call it, is very discriminating, and that part of it which notices him at all looks upon man as a land animal; one that gropes about the ground, and awkwardly at that, often stumbling and ever making more noise than his progress calls for; but when perched in a tree, as an arboreal creature, he is to be studied anew. So, at least, thought the crows that very soon discovered my lofty quarters. How they chattered and scolded! They dashed near, as if with their ebony wings to cast a spell upon me, and, craning their glossy necks, spoke words of warning. My indifference was exasperating at first, and then, as I did not move, they concluded I was asleep, dead, or a dummy, like those in the cornfields. The loud expostulations gave place to subdued chatterings, and they were about to leave without further investigation, when, by the pressure of my foot, I snapped a dead twig. I will not attempt description. Perhaps to this day the circumstance is discussed in corvine circles.

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

78.

Which best expresses the main idea of the passage?

A Living in a tree house is superior to living on the ground.

B Oak trees are full of all sorts of unexpected animals.

C Humans should stop cutting down trees.

D The author enjoys traveling through the tree tops.

79.

Which word best describes the attitude of the narrator in the passage?

A grave

B hostile

C impassioned

D vengeful

80.

In line 50, “discriminating” most nearly means

A despicable

B objective

C perceptive

D worrisome

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

81.

According to the passage, what kind of birds discovered the narrator?

A	Blue Jays
B	Crows
C	Hummingbirds
D	Pigeons

82.

We can infer from Line 68 that when the narrator “snapped a dead twig”...

A	He intended to scare the birds.
B	He must have fallen from the tree.
C	He was examining the twig for insects.
D	The birds discovered he was “alive”.

Passage

The most famous figure in the ancient Sumerian civilization is Gilgamesh, legendary king of Uruk. He is known due to the Epic of Gilgamesh, a collection of Sumerian legends, later translated and written down in Akkadian. It tells about the adventure of Gilgamesh, his friendship with Enkidu, a wild man raised by animals, and his journey to obtain the secret of immortality.

In the Epic, Gilgamesh is portrayed as a young king full of arrogance and pride. Gilgamesh is a bully, and has no friends. The gods are worried because Gilgamesh is so unkind to his people, so they send Enkidu, a wild man every bit Gilgamesh's equal, to be his friend. When they meet each other, Gilgamesh starts a fight, but he discovers that Enkidu is so strong that he cannot win; but Enkidu discovers the same thing about Gilgamesh. As soon as they have tired each other out, without one or the other winning, they become fast friends. Enkidu teaches Gilgamesh kindness, while Gilgamesh teaches Enkidu to be civilized. Both grow up to be very handsome.

Gilgamesh decides he needs a tree for the roof of his palace, so he proposes a quest to the cedar forest to cut down a tree. Enkidu is horrified and warns Gilgamesh of the terrifying monster Humbaba who guards the forest. Gilgamesh manages to persuade his friend to go anyway, and they go on the quest in search of the tree. Together they meet and kill the monster, and chop down the tree.

But the death of Humbaba makes the gods angry. Further, the goddess Inanna sees Gilgamesh and wants him for her husband. But Gilgamesh tells her that she has already had too many husbands, and she has used them all up — she even kills them when she tires of them! Angered, Inanna persuades her father to release the Bull of Heaven in Uruk, to destroy Gilgamesh and his people. The Bull runs wild in the streets, for to touch it is death. Many are slain by the touch of the Bull, its horns or its flanks or its tail.

Enkidu and Gilgamesh go out to destroy the Bull, and they succeed in killing it. But the Bull manages to touch Enkidu, who sickens and dies. Gilgamesh is heartbroken, and refuses to let anyone care for the body or bury his friend. He delays so long that maggots begin falling out of Enkidu's eye sockets and nostrils. Finally, Gilgamesh consents to the burial of his friend, but he cannot bear the thought of dying himself. His mother tries to console him and tell him that death is normal, but the king of Uruk will not hear it. He resolves to go to the ends of the earth in search of a cure for dying — a way to become immortal.

83.

The passage is primarily concerned with describing

A how the Akkadian language was used.

B the different gods and monsters in Sumerian culture.

C the history of the friendship between Gilgamesh and Enkidu.

D the origins of the Sumerian civilization.

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

84.

According to the passage, which of these words would best describe Gilgamesh before he met Enkidu?

A amiable

B benevolent

C magnanimous

D pompous

85.

According to the passage, Inanna asked to release the Bull of Heaven to

A avenge the death of the monster Humbaba.

B break up the friendship between Gilgamesh and Enkidu.

C protect the city of Uruk from other monsters.

D punish Gilgamesh for rejecting her romantic advances.

86.

In line 53, “consents” most nearly means

A agrees

B celebrates

C refuses

D suspends

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

87.

In the 5th paragraph (lines 46 - 59) the author implies that Gilgamesh did not let anyone care for Enkidu's body because

A he believes that Enkidu is an immortal and not truly dead.

B he does not trust anyone else to care for the body properly.

C if anyone touches Enkidu's body they will become sick and die.

D he is too saddened by the death of his friend to bury the body.

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

Passage

Make it simpler.

From the very inception the Kodak Idea has been—make photography so simple that anybody can take good pictures.

Simpler cameras, simpler processes have followed each other with almost startling rapidity. But the Kodak Company has not been satisfied with merely making mechanical and chemical improvements; it has assumed the responsibility of educating people in picture taking. The very first Kodak, way back in 1888, was accompanied by a so-called "manual" that did more than merely explain the operation of the mechanical features of the camera. It showed how the pictures should be taken, how (and how not) to photograph a tall building, how to photograph a small child—told about the length of exposures in different kinds of light, both in-doors and out. It was really a primary hand-book of photography.

From that day on, every piece of Kodak apparatus, every amateur product of the Company has been accompanied by the most concise instructions, instructions that were also constructive because they not only told the beginner what to do but why he was to do it. As with all Kodak advertisements, as much space is given up to telling people how to make pictures as in telling them why they should buy Kodak goods. Booklets in large editions, giving instructions in practically every phase of amateur photography have been and still are distributed without charge. Photography has not merely been made simpler, it has been explained to all who are interested.

And now comes a new help to the beginner—"Kodakery," a little magazine that will tell the amateur how to get better pictures. It's beautifully illustrated. Written and edited by those who know photography inside and out and who also know the places where the amateur has trouble, it will be a joy and a help to every enthusiast, will add for thousands to the Witchery of Kodakery.

Every purchaser, after May 1st, 1914, of a Kodak or Brownie camera will be entitled to "Kodakery" for one year without charge—he may have it continued by subscribing at 50 cents per year if he so desires. In the back of each Kodak and Brownie manual, which we are now printing, is a "subscription blank" which, upon being properly filled out and mailed to—"Kodakery," Toronto, Ont.—will entitle the purchaser of such camera to one year's free subscription to "Kodakery." At the time this plan goes into operation there may still be some such manuals without a subscription blank, but in such case a blank may be obtained from the dealer of whom the camera was purchased. Every purchaser of a Kodak or Brownie Camera is entitled to one copy of the manual or instruction book and to one year's subscription to "Kodakery."

This little magazine is but a part of the Kodak Service. To sell a camera and then turn the customer adrift has never been a part of the Kodak plan. Along with our improvements in apparatus and materials, we have always endeavored also to improve the Kodak Service.

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

88.
The main purpose of the passage is

A to advertise the release of Kodak's latest magazine, “Kodakery”.

B to describe how Kodak cameras work.

C to provide details about how to take better photographs.

D to recount the history of photography.

89.
The passage provides information to answer which question?

A How did early photography work?

B When was the first Kodak camera released?

C Where are Kodak cameras made?

D Who founded the Kodak company?

90.
We can infer from this passage that

A Kodak was the most popular of the camera companies in the 19th century.

B Kodak wants to sell cameras to amateur photographers.

C “Kodakery” was implemented to curb Kodak's falling sales.

D “Kodakery” was written by amateur photographers.

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

91.

In line 44, the “Witchery of Kodakery” implies what about cameras?

A	Cameras were associated with witchcraft.
B	Cameras were seen as dangerous.
C	Cameras were unpopular at the time.
D	Cameras were viewed as new and amazing.

92.

In line 69, “endeavored” means

A	aspired.
B	discouraged.
C	protested.
D	suspended.

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

Passage

Once upon a time there was a man and his wife and they had a ring of gold. It was a lucky ring, and whoever owned it always had enough to live on. But this they did not know, and hence sold the ring for a small sum.

But no sooner was the ring gone than they began to grow poorer and poorer, and at last did not know when they would get their next meal. They had a dog and a cat, and these had to go hungry as well. Then the two animals took counsel together as to how they might restore to their owners their former good fortune. After a while, an idea finally hit the dog.

"They must have the ring back again," he said to the cat.

The cat answered: "The ring has been carefully locked up in the chest, where no one can get at it."

"You must catch a mouse," said the dog, "and the mouse must gnaw a hole in the chest and fetch out the ring. And if she does not want to, say that you will bite her to death, and you will see that she will do it."

This advice pleased the cat, and she caught a mouse. Then she wanted to go to the house in which stood the chest, and the dog came after. They came to a broad river. And since the cat could not swim, the dog took her on his back and swam across with her. Then the cat carried the mouse to the house in which the chest stood. The mouse gnawed a hole in the chest, and fetched out the ring. The cat put the ring in her mouth and went back to the river, where the dog was waiting for her, and swam across with her. Then they started out together for home, in order to bring the lucky ring to their master and mistress.

But the dog could only run along the ground; when there was a house in the way, he always had to go around it. The cat, however, quickly climbed over the roof, and so she reached home long before the dog, and brought the ring to her master.

Then her master said to his wife: "What a good creature the cat is! We will always give her enough to eat and care for her as though she were our own child!"

But when the dog came home they beat him and scolded him, because he had not helped to bring home the ring again. And the cat sat by the fireplace, purred and said never a word. Then the dog grew angry at the cat, because she had robbed him of his reward, and when he saw her he chased her and tried to seize her.

And ever since that day, cats and dogs are enemies.

93.

According to the passage, why was the ring important?

A	The ring could be sold for a lot of money.
B	The ring was lucky.
C	It was the man's wedding ring.
D	The ring had a very valuable diamond in it.

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

94.

Personification is when human traits are attributed to something non-human or abstract. Which of the following lines can be considered personification?

A "an idea finally hit the dog"

B "the cat carried the mouse to the house"

C "the dog took her on his back and swam across with her"

D "there was a man and his wife and they had a ring of gold"

95.

The main purpose of this passage is to

A tell a story that explains why cats and dogs are enemies.

B provide evidence that cats cannot be trusted.

C explain why the author prefers dogs to pets.

D caution against selling treasured possessions for money.

96.

According to the passage, the dog was unable to get back to his master's house first because

A he could only run on the ground while the cat was able to climb roofs.

B he had lost his way.

C he was injured.

D he was unable to swim across the river.

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

97.

We can infer from this passage that the cat

A did not care about the dog being beaten and scolded.

B felt guilty for not sharing credit with the dog over finding the ring.

C had befriended the mouse after getting the ring back.

D had planned to deceive the dog all along.

A clown would help car-pool his fellow performers to the circus every day. The number of passengers per pick up was always a prime number. Which of the following sets could represent the number of people the clown picked up at each stop?

A	1, 3, 5, 9, 12
B	2, 3, 4, 5, 6
C	2, 3, 4, 7, 11
D	3, 5, 7, 11, 13

100.

Which of the following prefixes refers to a polygon with 8 sides?

A	hepta-
B	hexa-
C	octa-
D	penta-

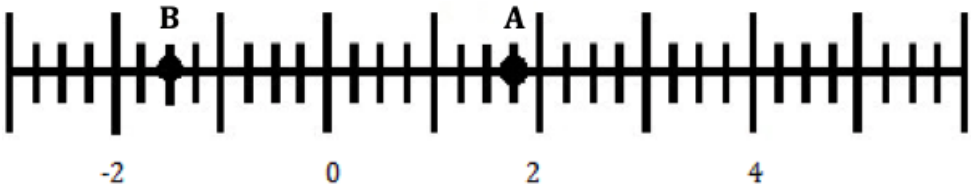

101.

What is the difference between the number nineteen thousand three hundred forty-nine, and the number three thousand six hundred twenty-five?

A	Fifteen thousand seven hundred twenty-four
B	Five thousand seven hundred forty-two
C	Five thousand seven hundred twenty-four
D	Fourteen thousand seven hundred twenty-four

102.

Based on the number line below, which of the following is a true statement?

A	B > 0
B	A < 0
C	A < B
D	A > B

103.

What is the value of the expression 978 + 1,013

A	1,791
B	1,891
C	1,991
D	2,991

104.

Which of the following expressions are equal to 24?

A	(11 x 2) + (4 ÷ 2)
B	(4 x 3) + 10 - 5
C	10 + 8 + 6 + 4 + 2
D	$2^2 + 3^2 + 4^2$

105.

The following table shows the number of patrons at three different coffee shops throughout various hours in the morning.

Coffee Shop	Starbucks	Coffee Bean	Cup of Joe
6:00 A.M.	26	14	7
7:00 A.M.	52	30	14
8:00 A.M.	65	60	94
9:00 A.M.	68	76	36

At which hour were the most patrons served at the three shops?

A	6:00 A.M.
B	7:00 A.M.
C	8:00 A.M.
D	9:00 A.M.

106.

Which of the following decimals is equal to $^{14}/_{35}$?

A	0.40
B	0.50
C	0.60
D	0.70

What is the mode of the following set of data?

{6,6,7,7,7,7,7,8,8,9,9,9,9}

A	6
B	7
C	8
D	9

114.

Alice took the sum of a prime number and a composite number and it was equal to a multiple of 9. Which of the following could have been her sum?

A	13 + 14 = 27
B	17 – 3 = 14
C	23 + 16 = 39
D	24 – 15 = 9

115.

The area of a rectangle is $A = l \times w$ (A = area, l = length, w = width). Which of the following equations can be used to find the length of a rectangle with an area of 60 square inches?

A	$l = 60 - w$
B	$l = 60w$
C	$l = {}^{A}/_{60}$
D	$l = {}^{60}/_{w}$

116.

Which of the following decimals falls between $^{2}/_{6}$ and $^{4}/_{5}$?

A	0.25
B	0.30
C	0.50
D	0.90

120.

An equilateral triangle has sides of 8 while a rectangle has a length of 12 and a width of 18. What is the sum of their perimeters?

A	38
B	44
C	68
D	84

121.

In the graph below, what are the approximate coordinates for where the two lines intersect?

A	(-2,-3)
B	(2,3)
C	(4,6)
D	(8,10)

122.

Marcus is building a painting completely out of Legos. The blank canvas measures 25 inches by 42 inches. If each block of Lego measures 2 inches by 5 inches, how many Legos does Marcus need to fill the entire canvas?

A	105 Legos
B	120 Legos
C	140 Legos
D	90 Legos

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

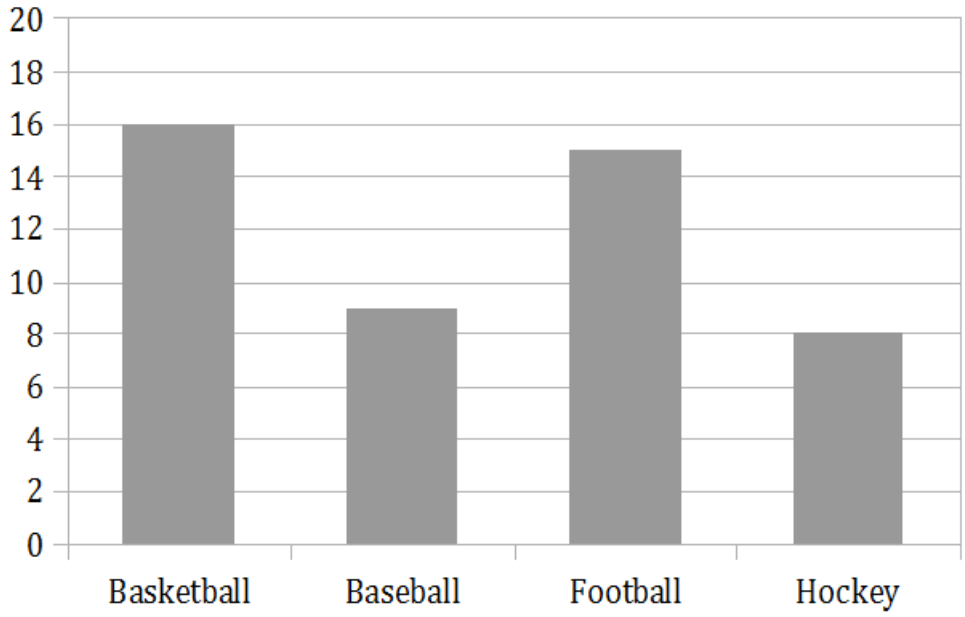

123.

What is the product of $4^{2}/_{7}$ x $3^{1}/_{3}$?

A	$12\ ^{2}/_{21}$
B	$13\ ^{2}/_{7}$
C	$14\ ^{2}/_{7}$
D	$15\ ^{5}/_{7}$

124.

The students in Mr. Smiley's class were asked what their favorite sports was. The following chart shows the results of the survey.

What is the range of the given data?

A	10
B	11
C	8
D	9

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.

125.

Santa Claus lost his gift list, so he started handing out toys at random from his bag. His bag contains 28 bicycles, 44 board games, 19 electronic devices, and 53 action figures. What is the chance that the next child on Santa's stop will receive a board game?

A	$^1/_2$
B	$^1/_4$
C	$^{11}/_{36}$
D	$^7/_{36}$

126.

There was a new fondue restaurant opening in town. At the restaurant, there were 170 fondue fountains in all: 30% of the fondue fountains were chocolate, 50% were cheese, and the remainder were oil-based. Which of the following numbers could represent how many fountains there were of each fondue?

A	30 chocolate, 50 cheese, 20 oil
B	51 chocolate, 85 cheese, 34 oil
C	51 chocolate, 34 cheese, 85 oil
D	85 chocolate, 51 cheese, 35 oil

127.

If $\frac{3}{4}x + 10 = 16$, what is the value of *x*?

A	4.5
B	6
C	8
D	24

Essay

Instructions

You will have 30 minutes to plan and write an essay on the topic printed on the other side of this page. Do not write on another topic. An essay on another topic is not acceptable. The essay is designed to give you an opportunity to show how well you can write. You should try to express your thoughts clearly. How well you write is much more important than how much you write, but you need to say enough for a reader to understand what you mean. You will probably want to write more than a short paragraph. You should also be aware that a copy of your essay will be sent to each school that will be receiving your test results.

128.

What would be your perfect vacation? Where would you go and what would you do?

This document was prepared on 11/04/2026 for Caitlin Fan. Unauthorized use is prohibited.
